Pulse™ Range
2018 - 19

Pulse™ takes the guesswork out of barbecuing

When does food intertwine with technology? When it's cooked on Weber's revolutionary electric barbecue, the Pulse. Ushering in an era of infinite barbecuing possibilities, the Pulse fuses everything you need from a traditional barbecue, with the simplicity and convenience of electrical power. And there's no compromise on the Weber® flavour either – a first for electric barbecue cooking. Your family and friends won't believe their taste buds.

The Pulse range is uniquely integrated with Weber iGrill® smart technology. That means you can accurately measure the grill temperature, as well as track the progress of your food as it cooks to perfection through the iGrill app on your smart device. Through iGrill's settings and alerts, your Pulse barbecue will literally tell you when it's ready to cook, and when your food is cooked just the way you like it. With porcelain coated cast iron cooking grills and the power to cook at temperatures up to 300°C, the Pulse will impart a beautiful barbecue flavour in your food, as smoke circulates under the lid. And because the grills hold and conduct high heat evenly, you'll have amazing sear marks and caramelisation on your favourite cuts of meat.

The built-in grease management system automatically funnels grease and debris away from the heating element, allowing for easy clean-up. To deliver further ease of use, the front control panel disconnects for easy access, doubling to provide more efficient storage and protection when your barbecue is not in use. The Pulse's high lid allows for larger cuts of meat like roasts and whole poultry to be barbecued with ease.

The Pulse is available in two sizes – the compact Pulse 1000, and the larger Pulse 2000. With two heat zones and a grill space of 1796cm² on the Pulse 2000, you have the flexibility to split your cooking area; searing steak on high heat on one side, while on the other, your side dish cooks over a lower heat.

Weber Pulse 2000

WHAT SETS PULSE™ APART?

High lid
The lid of the barbecue is high enough to provide ample room for barbecuing whole chickens and roasts.

Stainless steel side table
The side table can be stored vertically to save space when not in use.

Integrated iGrill® Technology
The integrated iGrill feature provides real-time monitoring of the internal temperature of the food and the grill temperature, direct to your smart device.

Status indicator lights
Red lights pulse when heating and turn solid when preheat temperature is reached.

Porcelain-enamelled cast iron cooking grills
Conduct heat evenly for great searing and retain heat for fast temperature recovery.

Grease management system
The grease management system consists of a lid and bowl liner that channels drippings into the drip tray, which is located within the catch pan under the cook box.

Power on/off button RCD reset
The Pulse has an integrated safety device suitable for outdoor use.
