weber

Premium Weber® Q® Range
2018 - 19

www.weberbbq.com.au

Why do people love the Weber Q so much?

An Aussie snag is just a snag, right? And an Aussie steak, well it's great, but it's just a steak. Right? Wrong. Our Weber Q will transform either of these simple old favourites into juicy, mouth watering masterpieces.

All the versatility of kitchen cooking without the dirty appliances

It's not just the amazing barbecues though. Using Weber Q accessories can transform your Weber Q into a brilliant convection oven. Now your Weber Q can cook roasts with that famous Weber flavour; chicken, beef, lamb, pork and fish. And the Q can also cook perfect pizzas, stir fries, vegetables, vegetarian meals and breakfasts. Cakes, muffins and puddings cook just like in the oven. In fact, the Q is so versatile it's like having all your kitchen cooking appliances rolled into one, cooking just outside the back door, helping to keep the kitchen clean, tidy and free of heat and smells. Imagine never having to clean the oven again!

How does it work?

The cast iron cooking grills feature a protective roof section directly above the Q shaped gas burner(s). As a result, you can enjoy fat free cooking without those uncontrollable flare ups. The slots between the grill bars allow for natural convection so that air circulates around the meat, yet the roof section prevents fat and juices from falling onto the gas flame. You superheat the cast iron grill so you can brand the 'perfect steak', yet instead of flaring up, the fat falls harmlessly away from the food and finds its way into a small disposable tray below (this feature is really quite amazing and that is why our company decided to patent it). To work its flavour magic, the Q takes advantage of the conducted heat transfer from the heavy-gauge cast iron cooking grill.

The Weber Q's no-mess cooking system

Look at anybody's barbecue area and you'll usually find fat stains where fat has been spitting from the barbecue to the patio or paving below. As our Q cooks with its lid closed, barbecue spatter and stains just don't happen.

CHOICE reveals the truth about barbecues

CHOICE was founded in 1959 and their mission is to give consumers the best independent, transparent and unbiased advice possible.
Their most recent barbecues review took an in depth look at a very big selection of barbecues, including the popular Weber Q's. People love their Weber Q and it's not surprising really. It's because the Q's cooking system creates delicious food that other barbecues just can't match.
If you are serious about investing in a barbecue, you should definitely get a copy of the CHOICE report (www.choice.com.au). It will really open your eyes.

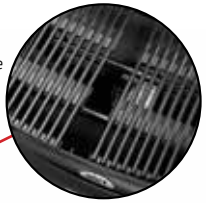
Weber Q pays for itself over and over again

If saving money matters to you, it simply doesn't make sense to use an old fashioned barbecue that cooks with the lid up. Cooking with the lid raised is like using the air conditioning on a 40°C day and leaving the roof wide open.
These days, so many people save money by using a Q nearly all of the time. It's not just the money though; once people experience the flavour of Weber's lid down cooking, they just can't accept cooking the old way again.

WHAT SETS THE WEBER® Q® APART?

Precision thermometer
Monitor the internal temperature of the Weber Q while barbecuing, roasting or baking.

Two porcelain enamelled cast iron cooking grills
Cast iron conducts and holds heat evenly to create the perfect cooking surface. Porcelain coating prevents rusting.



Lid down cooking system
Weber flavour is imparted by smoke circulating under the lid. Food cooks faster to save gas, time and money.

Lifetime ignition
All Weber Q ignition systems are guaranteed to work for the life of your barbecue.

Infinite control burners
Allows for total control of the heat in your barbecue.

Simple cleaning system
Fat and juices fall past the burners and are channelled into a disposable drip pan outside the cooking area. Makes cleaning easy and reduces the chances of a fat fire.

Quality construction
A combination of cast aluminium, stainless steel, porcelain coated cast iron and thermoset resin. The Weber Q is designed to last for years outside without rusting.

*We've assumed that all burners are used on HIGH for 30 minutes, enough to cover both preheat and cooking time and that the swap over cost of a 9kg gas bottle is $30. A four burner barbecue (with 72MJ output) for example, costs around $2.27 per meal to run. The saving you get with Weber's Family Q is astonishing, with the cost coming down to 70c per meal.
